COMMENTS

Dean, you're right. This week didn't have a lot of useful feedback. I think this first week is more here for us to get used to the schedule of the course. Next week, things get more complicated, and there will be lots of opportunity to received and provide feedback. You're staying ahead, that's good. Just make sure that you are watching my announcements each week. They'll help you save some time. Great work this week!

COMMENTS

Hey Dean, it looks like there were two different places to submit this week's assignment. I'm sorry about that confusion. This assignment is the correct assignments. I saw that Larissa, my TA, already graded your assignment, but it was in the wrong place. Not her fault. The course was set up incorrectly. I've moved your grade to here, where it will actually count towards your final grade. Sorry again for the mix-up. Great work this week!

Dean,

I really like the way your journal entry is organized. It makes it easy to grade and follow. It also means that you're organized, and this will pay off as you learn to program. I'm glad to hear that things are starting to make more and more sense.

Dean, I use SQL all day in my job, but I learned JavaScript first, so I'm the opposite. I think SQL is more complicated than JavaScript, ha ha 😂. At least, I feel that the IF ELSE statements are far easier in JavaScript than CASE statements in SQL, but that's just me. You're still ahead, so excellent work! Daen, I'd plan to start working on things as early as possible on the week, since some weeks it'll be easier for you overall, but some others you'll need to spend more time understanding everything. Also, make sure to use the peer review and don't be afraid to reach out for help if you need.
